innovation policy challenges for the 21st century

As the economies of western countries move from primarily resource-based to knowledge-based, and trade liberalization limits what governments can do through direct action, the landscape of innovation is changing and policymakers must react accordingly. This exciting new book examines the challenges that policy makers face in responding to a new environment. The book addresses how governments are n...

navigating organizations through the 21st century

"Leadership needs to go beyond what one does to achieve a particular goal or objective, financial or otherwise, or what one does to direct others to achieve them. To effectively lead an organization today, you must be like the navigators of old, watching for ever-changing winds and keeping an eye on the compass while you look out for shoals, yet always recognizing you're a part of the crew. How d...

facing human capital challenges of the 21st century

Describes the education and labor market initiatives implemented or under way in four countries in the Arab region--Lebanon, Oman, Qatar, and the United Arab Emirates--to address the human resource issues they each face as they prepare their countries for a place in the 21st century global economy. Together, these countries highlight the variety of challenges faced by countries in the region and r...

plant disease epidemiology facing challenges of the 21st century

Plant disease epidemiologists have a strong scientific tradition in studying climate-pathogen-disease relationships. Biodiversity is also of global concern. The decline of global biodiversity that is currently taking place has been referred to as the sixth great extinction process our planet has experienced during its history, but this time, it is man-made. Generations of plant pathologists, and e...

positioning synthetic biology to meet the challenges of the 21st century

Synthetic biology -- unlike any research discipline that precedes it -- has the potential to bypass the less predictable process of evolution to usher in a new and dynamic way of working with living systems. Ultimately, synthetic biologists hope to design and build engineered biological systems with capabilities that do not exist in natural systems -- capabilities that may ultimately be used for a...

driving 21st century 20th century 19th century thinking
America's future depends on a vibrant highway system capable of supporting industry and the travel needs of its citizens. The country's highway system can trace its roots to the movements of major armies in colonial times, such as British General Braddock using George Washington's assistance in a disastrous attack of French forces defending Ft. Duquesne. These early roads developed into the engin...
